

ZEPRO ZHZ

Suitable segments

- Construction
- Wholesalers
- Highways
- Local authorities
- Railways
- Parcel deliveries
- Bakeries
- Home delivery services

Purpose-built for panel vans and urban logistics, the ZEPRO ZHZ500/600 lift delivers faster, safer, and more sustainable final mile performance with compact, lightweight design, intuitive controls, and proven long-term reliability for maximum uptime and ROI.

Purpose-built for panel vans & final mile efficiency

Designed specifically for panel vans and urban logistics, this two-cylinder lift combines compact design, robust yet lightweight construction, and flexibility – ensuring maximum operational efficiency for final mile deliveries.

Fast, flexible operation

Advanced hydraulics ensure smooth, fast operation in all conditions – ideal for tight or uneven delivery sites. Half-width and folding platforms give drivers quick, unobstructed access

ZHZ Specifications	
Platform width	1400 mm
Platform depth	Up to 1600 mm*
Lifting capacity	500 kg and 600 kg
Bed height max	850 mm
Voltage	12V
Platform	Aluminium
Weight of complete lift	199 kg
Max vehicle weight	Panel vans**

*See specification sheet for details

**See specification installation manual for details

to cargo without using the lift for small parcels, saving time at every stop. A full-size platform option handles larger loads.

Enhanced safety & operator comfort

Intuitive, ergonomic controls reduce fatigue and improve both safety and productivity. The optional integrated step offers easier cargo access, improving efficiency and ergonomics during frequent deliveries.

Long-term value

The ZHZ500/600 tail lift delivers lasting corrosion protection with premium powder coating. Featuring durable hydraulics with a ClearOil long-life filter, optional solar panels, and tested for 30,000 lift cycles (12 years), it cuts downtime by up to 66%, installs in under 4 hours, and maximises ROI.

Options

Safety	Trolley stops Flashing warning lights Non-slip platform
Operation	Up to three controls can be used, including one radio remote control Platform available as full width or half width as well as foldable 600 kg capacity available
Material	Platform in anodised aluminium High strength steel structure Powder painted according to automotive standards
Installation	Mounting brackets for all major van manufacturers available
