

MDL

DESIGNED FOR EASY HANDLING OF WHEELED CARTS, BINS AND RACKS

Lifting capacities of 1,250, 1,600, 2,000, and 3,000 lbs.

Features vertical tracks that enable the platform to move via chains in conjunction with a hydraulic cylinder for maximum strength and performance.

The tracks are welded to the rear frame of the trailer, pick-up truck, service, stake or truck body to ensure optimum safety.

The platform conveniently stores over the rear door during travel.

Reliable performance:

The dual chain system lifts the platform parallel to the truck bed, on even or uneven road surfaces. The electrical system has a dedicated ground wire, fully potted toggle switches, and one solenoid to keep you moving.

Safer operation:

Built-in toe deflector designed to prevent a pinch point between the platform and truck bed when raising.

Low maintenance:

UHMW pads eliminates downtime and roller replacement costs.

Recommended Segments

- Food and Beverage
- Rental/Leasing
- Construction
- Health Care
- Hospitality
- Retail
- Floral
- Landscaping

MDL Specifications	
Platform width	89"
Platform depth	From 36" to 60"
Lifting capacity	1,250 lb., 1,600 lb., 2,000 lb., and 3,000 lb.
Bed height	Min 30" to Max 57"
Platform	Steel or Aluminum
Ramp	6" Fixed
Weight of complete lift	482 lbs. to 724 lbs.

Standard Features

Safety	Performance	Maintenance	Material
Built-in toe deflector	Level ride	Dedicated ground	Steel or Aluminum platform
Charge line circuit protection	Torsion assist	Weather protected unit	Powder coat finish
	Built-in 4 LED light kit		UHMW - Slide pads on runners

Optional Features

Safety	Performance	Maintenance	Installation	Material
12" Fixed ramp with cart stops	Above floor travel	Cycle counter	Stainless steel bolt-on kit	Galvanized option (requires aluminum platform)
Cab shut off switch	Hydraulic controlled close (only available on 54" and 60" platforms)			
	Remote hand held toggle switch control			
	102" wide platform
