

# DEL FC500/750

## Suitable segments

- Vehicle hire
- Wholesalers
- Retail
- Local authorities
- Laundry
- Retail
- Low floor vehicles

Delivering faster, safer, and more reliable last mile deliveries, our convenient full-closure integrated tail lift and rear door system maximises uptime, boosts efficiency, and offers long-term value through smart design and durable performance.

### Fast & efficient operation

Purpose-built for last mile deliveries, the DEL FC500/750 integrates tail lift and rear door into one lightweight, full-closure solution for all your 3.5 tonne vehicles. It eliminates the rear frame and shutter door for single-install simplicity; speeds up deploy-and-stow platform operation two-fold vs. traditional setups; and boosts payload and fuel saving – for maximum operational efficiency.

### All-weather performance & safety

The stable, level-ride platform with quick-acting hydraulics ensures safe, efficient operation for multiple loads in all conditions. A torsion-assisted design with flush lock, safety catch, and anti-tilt system delivers effortless, secure handling.

FC500/750 Specifications	
Platform width	2065 - 2280 mm in standard width*
Platform depth	1065 - 1370 mm*
Lifting capacity	500 kg and 750 kg
Bed height min/max	800 - 1060 mm
Platform	Aluminium
Weight of complete lift**	210 kg (FC500) 230 kg (FC750)
Max vehicle weight	3.5 t

### Options

Safety	<ul style="list-style-type: none"> <li>Pair of aluminium trolley stops</li> <li>Load safety device on each side</li> <li>Platform safety catch/anti tilt catch</li> <li>Auto erect fences</li> <li>Drop down fences</li> <li>Detachable fences</li> </ul>
Operation	<ul style="list-style-type: none"> <li>Level ride platform</li> <li>Torsion assisted platform</li> </ul>
Maintenance	Slide wear pads
Material	<ul style="list-style-type: none"> <li>Anodised aluminium platform and frame</li> <li>Top door in lightweight polymer material</li> <li>Steel housing</li> <li>Battery guard</li> <li>Solar panel kit</li> </ul>
Installation	<ul style="list-style-type: none"> <li>Pre wired extended slimline control</li> <li>Plyg-and-play</li> <li>Low floor application (toe guard to accommodate rear lights)</li> </ul>

With safety fence options and full EU compliance, our lifts protect both operators and bystanders.

### Maximum uptime & reliability

The simple, circuit-card-free electrical system and pre-drilled mounting brackets ensure quick installation and easy maintenance, while the bolt-together design allows fast component replacement to keep costs low. Backed by our extensive service network, your vehicles stay operational with minimal downtime.

### Long-term value

Built for lasting performance and a lower environmental impact with optional solar panels tripling battery life, advanced galvanising, optimised steel and aluminium structures, and a high capacity-to-weight ratio boosting fuel efficiency – for a lift that runs cleaner, lasts longer (7-10 years), and delivers maximum uptime and ROI.
