

MDL/HP

DESIGNED FOR THE FLEXIBILITY OF CARGO LOADING WITHOUT OPENING THE PLATFORM

Lifting capacities of 1,600, 2,000 and 3,000 lbs.

Features vertical tracks that enable the platform to move via chains in conjunction with a hydraulic cylinder for maximum strength and performance.

The tracks are welded to the rear frame of a trailer, pick-up truck, service, stake or truck body to ensure optimum safety.

The platform conveniently stores over the rear door during travel.

Reliable performance:

The dual chain system lifts the platform parallel to the truck bed, on even or uneven road surfaces. The electrical system has a dedicated ground wire, fully potted toggle switches, and one solenoid to keep you moving.

Safer operation:

Built-in toe deflector to prevent a pinch point between the platform and truck bed when raising.

Low maintenance:

UHMW pads eliminates downtime and roller replacement costs.

Recommended Segments

- Food and Beverage
- Rental/Leasing
- Construction
- Health Care
- Laundry
- Retail
- Floral
- Landscaping

MDL/HP Specifications	
Platform width	89"
Platform depth	From 40" to 54"
Lifting capacity	1,600 lb., 2,000 lb., and 3,000 lb.
Bed height	Min 30" to Max 56"
Platform	Aluminum
Ramp	12" Fixed
Weight of complete lift	700 lbs. to 782 lbs.

Standard Features

Safety	Performance	Maintenance	Material
Built-in toe deflector	Folding platform - hinges at 36"	Bolt-on platform sidebars	Aluminum anti-skid platform
	Level ride	Charge line circuit protection	UHMW - Slide pads on runners
	Torsion bar assist		Powder coat finish
	12" Fixed aluminum ramp		

Optional Features

Safety	Performance	Maintenance	Material
Dual cart stops	Above-floor travel	Cycle counter	Galvanized option
	Remote hand held toggle switch control		
	Hydraulic controlled close		
	102" Wide platform
